

Oracle –

All the questions carry 5 marks . kindly add BT level

UNIT 1 – CO1

- Q 1:- Explain the Oracle Architecture in detail.
- Q2:- Write short note on
- (i) Logical Storage Structure
 - (ii) Physical Storage Structure
- Q3:- What is Oracle Database and Oracle instance and explain in short.
- Q4:- Describe the concept of Privileges.
- Q5:- Illustrate the concept of Redo Log File.
- Q6:-How to manage the Rollback segment in Oracle.
- Q7:-Explain Managing password security and resources of oracle database.
- Q8:- Summarize managing Tablespaces and data files.
- Q9:- Discuss in detail the architecture of ORACLE Database.
- Q9:- Write short note on i) Data Files ii) Redo Log Files.
- Q10:- What are privileges? How they are managed.

UNIT 2-CO2

- Q1:- Discuss Oracle backup and recovery process in detail.
- Q2:- what is physical backup and Logical backup. Also state the difference between them.
- Q3:- Differentiate between physical and Logical backups.
- Q4:- State the Complete and Incomplete Recovery of an Oracle database.
- Q5:- Explain Export and Import Utilities.
- Q6:- Differentiate between Export Utilities and Import Utilities.
- Q7:- What is the difference between complete and incomplete recovery of Oracle database?
- Q8:- What is backup? Explain the concept of Oracle backup and recovery configuration.
- Q9:- What are the different types of Failure in Oracle?
- Q10:- Give the Recovery Structure and Processes in Oracle.
- Q11:- What are the two different ways to perform Oracle Backup and Recovery? (RMAN and User Managed)
- Q12:- write a short note on Backups in Oracle.

UNIT 3-CO3

- Q1:- Elaborate the Data types in SQL.
- Q2:- Discuss Sql's DDL, DML, DCL and TCL commands with syntax and example.
- Q3:- State different types of operators in SQL with example.
- Q4:- Specify the Clauses used in SQL with syntax and example.
- Q5:- Explain Arithmetic function of SQL.
- Q6:- Explain the features of SQL.
- Q7:- Explain the Integrity constraint in detail.
- Q8:- Write a Short note on Key Constraint in SQL.
- Q9:- Write about Adding and Deleting Constraints in SQL with its syntax.
- Q10:- Explain Logical Operators with syntax and example in SQL.
- Q11:- Write and explain different types of operators in SQL with its syntax.
- Q12:- Mention the WHERE Clause in SQL with syntax and example.
- Q13:- Discuss about different types of Conversion functions in SQL.
- Q14:- Explain the features of SQL.
- Q15:- Write a PL/SQL program to check whether the given number is prime or not.
- Q16:- What are the types of commands in SQL? Explain them.

UNIT 4-CO4

- Q1:- What are joins and mention different types of join with syntax and example.
- Q2:- Explain joins in detail.
- Q3:- Brief the Nested Sub Queries with set membership.
- Q4:- Explain sub query with DML command.
- Q5:- Explain Correlated Query using Operators.
- Q6:- Explain the concept of Indexes with its type.
- Q7:- Write about Sequences with Syntax and Parameters.
- Q8:- Discuss about Views in detail.
- Q9:- Explain the concept of SQL Join Query? What are the basic ways to join the data together?
- Q10:- Explain the concept of View? Explain with example how to create and drop the view.
- Q11:- Explain the concept of SQL join Query? What are the basic ways to join the data together?
- Q12:- What is sub query? What if sub query returns more than one value? Write a query to select all the fields of the first table SALARY and the names of employees from the second table EMP for those employees who had less than average salary.

UNIT 5-CO5

- Q1:- Define PL/SQL with structure and also state the difference between PL/SQL and SQL.
- Q2:- Explain the Block Functions of PL/SQL.
- Q3:- State all the Functions of PL/SQL.
- Q4:- Explain the concept of Cursor in detail.
- Q5:- Write short note on Triggers.
- Q6:- Define PL/SQL with Block definition structure.
- Q7:- Differentiate between SQL and PL/SQL.
- Q8:- State the syntax for Conditional Control in PL/SQL and give example.
- Q9:- Explain the Iterative Controls in PL/SQL with syntax and example.
- Q10:- Mention the syntax and give example for IF-ELSE Statement and GO TO Statement in PL/SQL.
- Q11:- Write and explain the Aggregate function of PL/SQL with Syntax
- Q12:- Differentiate between %Row TYPE and TYPE RECORD with detail example.
- Q13:- What packages are available to PL/SQL developers?
- Q14:- What is Cursor? Explain use of cursors with its example
